is that it doesn't play the videos? any idea how to fix it? A: It is not a solution but it is the only way to get sound for webm. The solution is to add sound to mp4 file, so file would be webm + mp4 with sound. And then upload file to youtube. I don't know how to do this in Apple Illustrator, I use the online service for making this sound to MP4. Here is the link: [package tech.wetech.weshop.user.exception; import lombok.extern.slf4j.Slf4j; import tech.wetech.weshop.common.api.ErrorCode; import tech.wetech.weshop.common.exception.ErrorCodeEnum; import tech.wetech.weshop.user.order.api.OrderPayResult; @Slf4j public class OrderNotExistException extends BaseWetechException { public OrderNotExistException\(ErrorCode errorCode\) { super\(errorCode.getErrMsg\(\)\); } public OrderNotExistException\(ErrorCodeEnum errorCode\) { public OrderPayResult getPayResult\(\) { return new OrderPayResult\(\); } Q: How to append a dataset to a single table within a row without overwriting the table? I have a dataset in R that is appended to the left column of a single table. The appended data will be to the left of the existing data in the table but I have already have a table using the rbind function. How can I append the data to the single table without overwriting the table? For example, I have the following code which is appended to the left column of the table dataset 82157476af](#)
