Detergent used in washing machine not flushing out Customer Question how toI have a dishwasher that used to work fine, but a few months back, it just won't work anymore. The drum... "I have a dishwasher that used to work fine, but a few months back, it just won't work anymore. The drum won't fill, won't agitate, won't look for a place to put the dishes and won't empty the tub. The door won't shut. I have a GE model FHE6230 that is about 5 years old. I just replaced the water pressure regulator and the steam valve in the wash cycle. The water just comes out of the cold water inlet valve and the high pressure vent valve is closed. But I'm missing something and the drum will not fill. The local appliance repair people say that the water is dirty and they need a new pump and filters. Is that true? And if so, can you tell me if there is a way to clean the water in my dishwasher? Thanks in advance for any help and sorry for the annoying question. Thank you, Robert The dishwasher uses detergent to clean your dishes, which is stored in the dispenser. The dispenser lets f678ea9f9e
